

MARC

**NON-ACID CLEANER (YELLOW) FOR ALUMINIUM
FINNED AIR CONDITIONER COILS**

DESCRIPTION

MARC is a newly developed product from Geekay, which is non-acid penetrating cleaner and renovator for aluminum finned air conditioner coils. This is used effectively to maintain high efficiency in air cooled condenser coils and large air handling units where rinsing is practical. This product can be also is used in Industrial Buildings, Apartment Complexes. Commercial Buildings, Schools and all air-conditioned building maintained by service repair shops or maintenance departments.

ADVANTAGES OF MARC:

- **FAST ACTION:** **MARC** cuts through only grime and industrial fallout deposits.
- **MONEY SAVING:** When used regularly **MARC** removes the insulating layers of dirt and grime that reduce efficiency and reduce running costs. It can be diluted in 3:6 ratio, which saves more money than the cost of the chemical.
- **LONG LIFE:** An inefficient condenser unit works harder and runs longer so it wears out faster and repair costs are higher.
- **NO ACID:** **MARC** is Alkaline based and no acid included in it. It will not etch glass and meets the requirements of Kuwait Laws and Acts.

PHYSICAL DATA

Type	: Alkaline Detergent Coil Renovator
pH factor	: 13
Color	: Pale Yellow Non
Flammability	: flammable
Toxicity	: Corrosive to the eyes. Harmful if swallowed.
Composition	: Biodegradable penetrants and detergents reinforced with Potassium and Sodium Hydroxide in aqueous solution

ENVIRONMENT SAFE:

MARC is chemically acceptable to clean in air cooled condenser coils and large air handling units where rinsing is practical in official establishments operating under the federal meat and poultry products inspection programs.

INSTRUCTIONS:

Use only as directed. Do not use where thorough rinsing is required. Read all precautions and directions before using. Dilute one-part **MARC** with 3: 6 ratio water in a plastic sprayer or applicator. Turn off unit so that fan is not in operation. Hose down condenser to cool fins.

Start at the top of the fins and spray until all areas are thoroughly wet with **MARC**. Allow 5 to 10 minutes for thorough reaction then flush with a water hose to completely wash all grime and **MARC** from the unit. For badly fouled units, repeat if it is necessary. Flush out all sprayers and buckets before storing.
